

Dialup setup: Mac OS 9

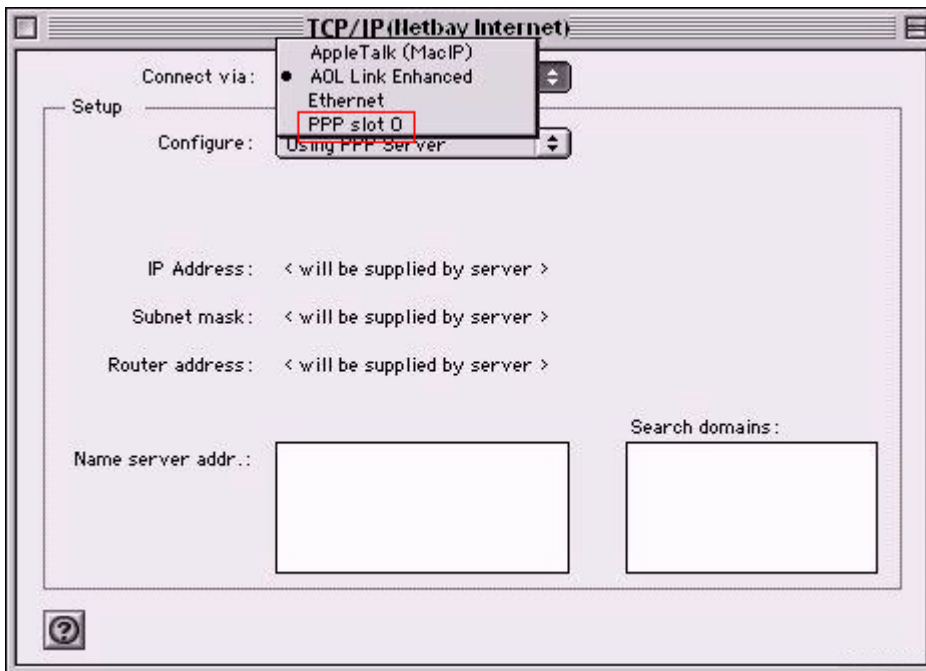

1. Go to the **Apple Menu**, click on **Control Panel** and select **TCP/IP**.

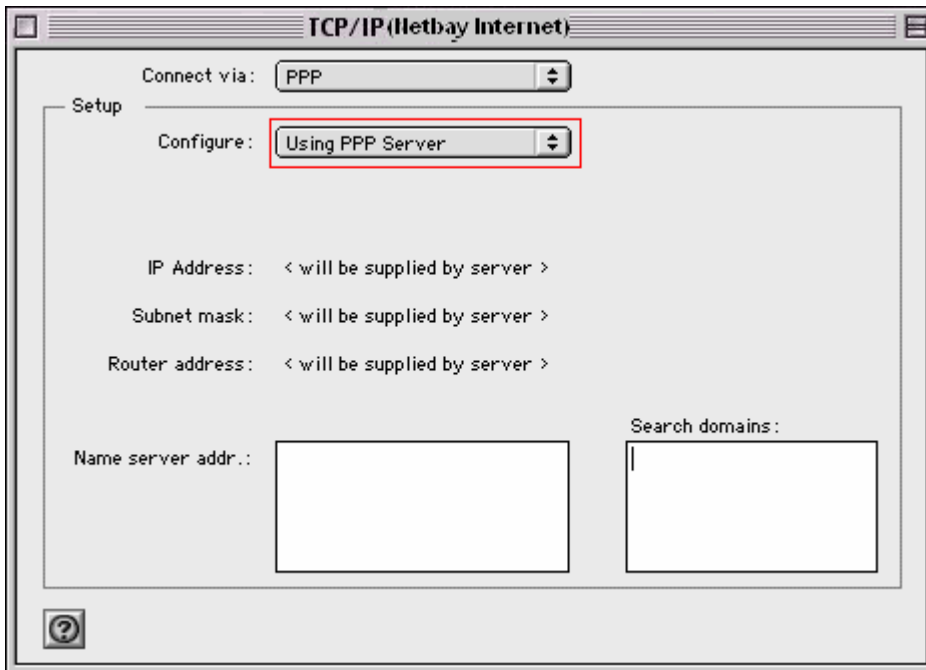

2. Click on **Connect via:** once

3. Select **PPP** from the **Connect via** drop down list.

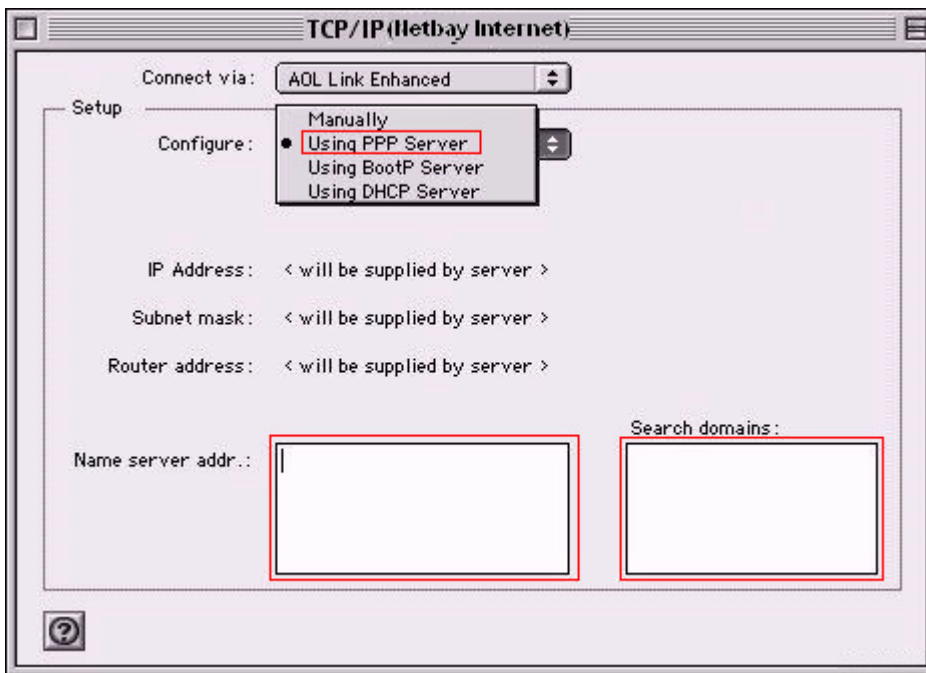

4. Click on the drop down list beside **Configure:** once

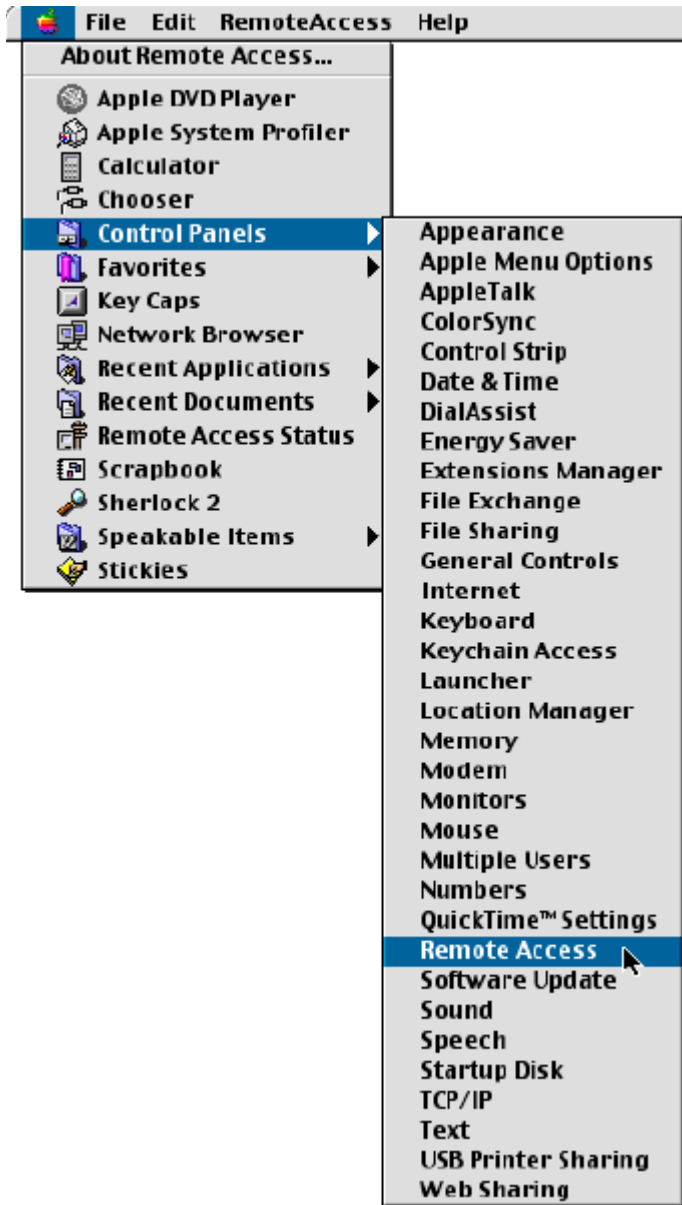

5. Select **Using PPP Server** from the **Connect via** drop down list and leave the other field blank.

Save and close the settings when done.

6. Go to the **Apple Menu**, click on **Control Panel** and select **Remote Access**.

7. Enter the configuration as per the screen capture below. Enter your Netbay Account username in the **Name** field and your Netbay password in the **Password** field.

Note: Account Name: your Netbay account username (Do not include @netbay.com.au at the end of your username)

Click on **Connect** when finish.

The screenshot shows a window titled "Remote Access (Netbay Internet)". Inside, there is a "Setup" section with two radio buttons: "Registered User" (selected) and "Guest". Below the radio buttons are three text input fields: "Name" containing "username", "Password" containing masked characters, and "Number" containing "0198307006". There is a checked checkbox labeled "Save password". At the bottom of the window, there are two buttons: "Options..." and "Connect". The "Connect" button is highlighted with a red rectangular box.
